- Some Other Subsection

Introduction

This is some text with **bold** and *italic* words¹.

¹This is a footnote.

Introduction

This is some text with **bold** and *italic* words¹.

Here comes a formula:

$$\int_0^{\infty} foo$$

¹This is a footnote.

Introduction

This is some text with **bold** and *italic* words¹.

Here comes a formula:

$$\int_0^{\infty} foo$$

- Here comes an item
 - And a subitem
 - And a subsubitem

¹This is a footnote.

Introduction

This is some text with **bold** and *italic* words¹.

Here comes a formula:

$$\int_0^{\infty} foo$$

- Here comes an item
 - And a subitem
 - And a subsubitem
- Here comes another item
 1. With numbered

¹This is a footnote.

Introduction

This is some text with **bold** and *italic* words¹.

Here comes a formula:

$$\int_0^{\infty} foo$$

- Here comes an item
 - And a subitem
 - And a subsubitem
- Here comes another item
 1. With numbered
 2. Items

¹This is a footnote.

Introduction

This is some text with **bold** and *italic* words¹.

Here comes a formula:

$$\int_0^{\infty} foo$$

- Here comes an item
 - And a subitem
 - And a subsubitem
- Here comes another item
 1. With numbered
 2. Items
 3. That appear incrementally

¹This is a footnote.

Outline

1. Some Section

2. Some Other Section

- Some Subsection
- Some Other Subsection

Here Is Some Code

To make code listings work, mark the frame as fragile.

```
1 def foo(a, b, c):  
2     # printing a, b, c  
3     print(f'a={a}, b={b}, c={c}')
```

Outline

1. Some Section

2. Some Other Section

- Some Subsection
- Some Other Subsection

Example: C Code

```
1 int main(int argc, char **argv) {  
2     for (int i = 1; i < argc; i++)  
3         printf ("argument %u: %s\n", i, argv[i]);  
4     return 0;  
5 }
```

Outline

1. Some Section

2. Some Other Section

- Some Subsection
- Some Other Subsection

Example: C Code ... Again ...

```
1 int main(int argc, char **argv) {  
2     for (int i = 1; i < argc; i++)  
3         printf ("argument %u: %s\n", i, argv[i]);  
4     return 0;  
5 }
```
